

One Size Doesn't Fit All

What Size Do You Need?

A number of personal factors affect how much garbage you generate. Farmington garbage customers can choose the size that best fits their needs. Is the size you have working for you? Three sizes - 30, 60, and 90 gallon - or a combination of carts are available. Call 651-280-6883 to change your service; you can change your cart size once a year without paying a service fee.

If you frequently have more garbage than what fits in your cart or way too much space in your cart every week, there are options available that may save you money. One option is to increase your garbage service level.

2016 rates (recycling is included in the rate) are:

30 gallons.....	\$46.00/quarter	120 gallons	\$80.50/quarter (2-60s)
60 gallons.....	\$57.00/quarter	150 gallons	\$90.50/quarter (1-90 and 1-60)
90 gallons.....	\$67.00/quarter	180 gallons	\$101.50/quarter (2-90s)

Recycling is beneficial to the environment and can help reduce your garbage service needs. Recycling markets are rapidly growing and items are added to the list of acceptable materials regularly! For current information on what you can recycle, visit www.ci.farmington.mn.us or www.rethinkrecycling.com.

Farmington residents report recycling more and being satisfied with the capacity of their recycling cart. However, if you have noticed that your recycling cart consistently does not hold all of your recyclables until collection day, first make sure you are breaking down your recycling so it takes up the least amount of space possible in the cart. If your cart is still overflowing ever other week, you can request a larger one by calling DSI at 952-469-2239.
