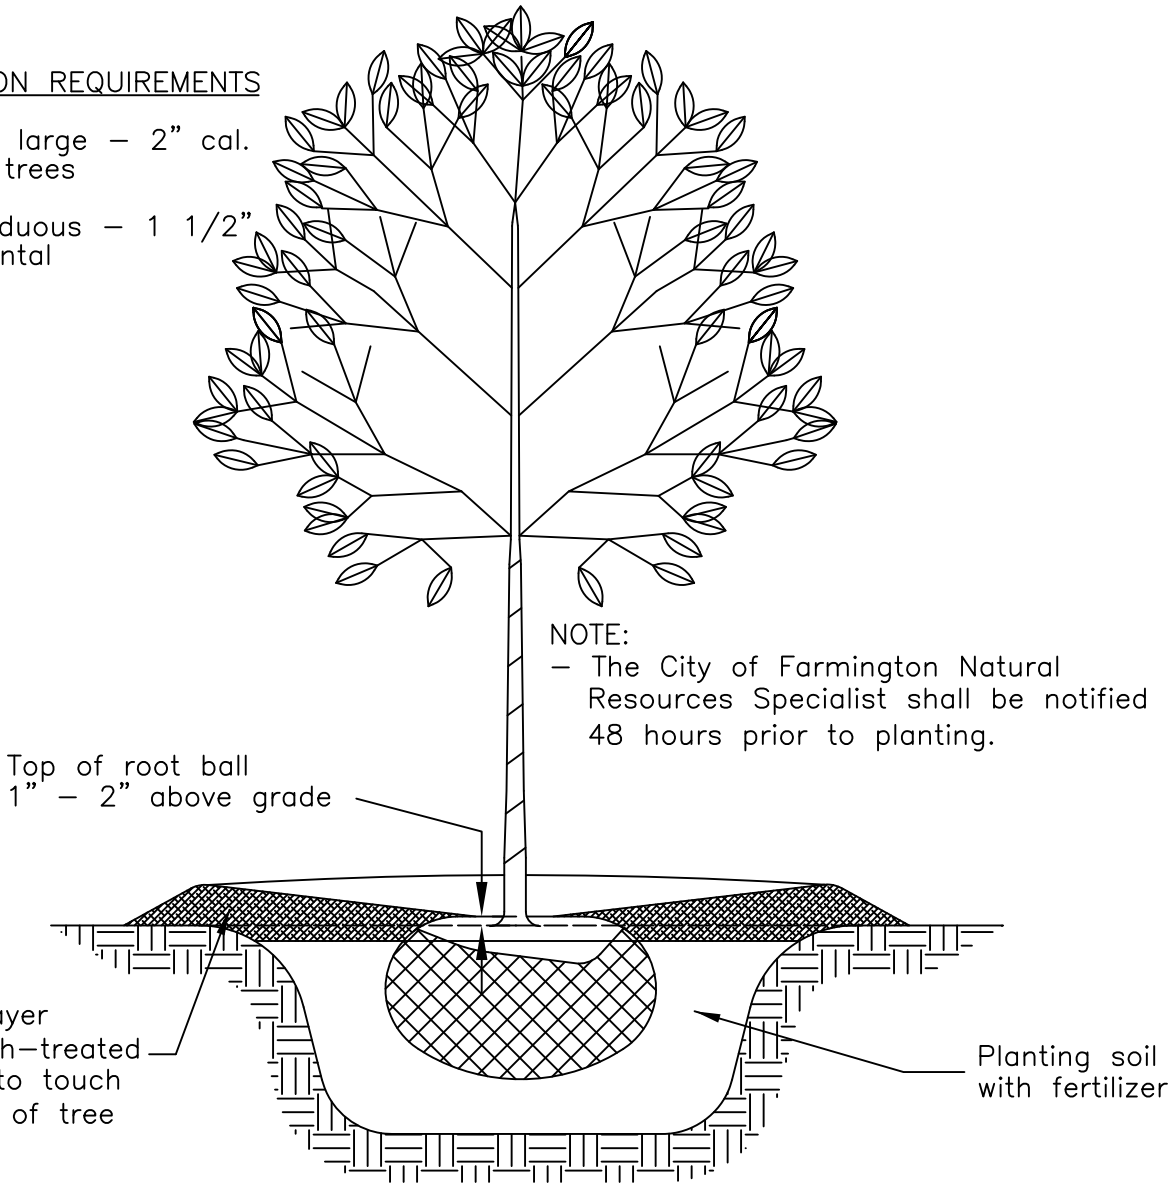
INSTALLATION REQUIREMENTS

Medium to large – 2" cal. deciduous trees

Small deciduous – 1 1/2" or ornamental



NOTE:

1. Turn back the top portion of the burlap to half the depth of root ball and remove any nails within this area.
2. Plant tree where the first roots flare out from the trunk.
3. Cut away as much plastic or wire basket around root ball, still keeping root ball intact.
4. Scarify the bowl surface for easy root penetration.
5. Lot Frontage trees to be planted on private property in the front yard at a minimum 40' on center spacing. Trees to be planted in accordance with City's landscape ordinance.
6. Trees shall be planted at least 8' from the front property line and out of the side drainage and utility easements.
7. No tree shall be planted within 10 lateral feet of any underground water, sanitary or storm sewer line and 2' from any other underground utility.
8. Do not cut leaders off the tree.
9. Staking of trees shall be done by contractor as needed.
